

PSC NO: 15 ELECTRICITY LEAF: 213.7
COMPANY: CENTRAL HUDSON GAS & ELECTRIC CORPORATION REVISION: 1
INITIAL EFFECTIVE DATE: 10/11/07 SUPERSEDING REVISION: 0

SERVICE CLASSIFICATION NO. 6 (Cont'd)

RESIDENTIAL TIME-OF-USE SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

6.6 (Cont'd)

Customers may choose from the following metering options:

- (a) Using a single time-differentiated watthour meter with bi-directional capability to measure the flow of energy in both directions; or
- (b) Using two meters to separately measure the flow of energy in each direction, with the customer's net output measured by a time-differentiated watthour meter purchased by the customer.

Customers electing to have their generator's output measured through a separate meter shall be responsible for the costs of any new meter box and socket, to the extent required.

Customers with electric hybrid generating equipment who satisfy all installation and operation requirements will be allowed to combine their purchases from and sales to the Company in a billing period. In the event that:

- (i) the amount purchased from the Company exceeds the amount sold to the Company (net purchases), the customer will be billed for the difference at applicable rates specified in this Service Classification.
- (ii) the amount sold to the Company exceeds the amount purchased from the Company (net sales) and the customer's wind generator does not exceed 10 kW, the difference will be transferred to the following billing period and added to amounts sold by the customer in that period. In that latter period, differences will either be billed at the applicable rate as in (i) above, or transferred to the following billing period depending on whether the differences represent net purchases or net sales, respectively.
