## Determination of Capital Costs:

In the case of newly constructed facilities, capital cost shall include all labor, transportation, material and applicable overheads as defined in the charges for special services contained in Schedule P.S.C. No. 119 - Electricity, or superseding issues thereof, and utilized in recording the cost of such facilities on the books and records of the Corporation.

\* No longer available for new installations or replacements.

\*\* Available only in Commercial and Industrial Floodlighting applications with base-down orientation of the bulb.

Transition Charge (Non-Bypassable Charge [NBC]):

All customers served under this Service Classification, taking service under the NYSEG Default Supply Option (DSO) rate will be required to pay a Transition Charge (NBC), as further described in General Information Section 25.B.

Commodity Service

The charge for Electric Power Supply provided by NYSEG will fluctuate each month as further described in General Information Section 25.C., Calculation of the Commodity Component.

In the event that NYSEG determines that it will incur an estimated gain or loss because purchases for DSO customers were made in the real-time market at prices differing from those in the day-ahead market, NYSEG will credit or recover the full amount of the estimated gain or loss through the non-bypassable charge from DSO customers.
