STAMPS: Issued in compliance with Order of PSC in C. 07-G-0299 dated 08/30/07

SERVICE CLASSIFICATION No. 17 - Continued

Daily Swing Service Monthly Imbalance Charge

The Company shall balance the Customer's account after each actual meter reading to zero. This shall be done by comparing the sum of the Customer's deliveries to the Company for the month to the Customer's actual usage for the same period. If the Customer consumed more gas than delivered to the Company for his account, the excess shall be purchased by the Customer at the Company's Monthly Cash Out Price for the same period. If the Customer consumed less gas than delivered to the Company for his account, the shortfall shall be credited to the Customer at the Company's Monthly Cash Out Price for the same period.

Marketer/Direct Customer Capacity Program

Any Marketer/Direct Customer currently using its own primary firm delivery point capacity to meet core customer requirements may continue to do so indefinitely at the volumetric level of such capacity as of November 1, 2007. However, if that Marketer/Direct Customer elects to reduce the amount of capacity, that reduced level will become the new maximum amount of Marketer/Direct Customer-owned capacity. In addition, any Marketer/Direct Customer using its own capacity to meet some or all of its customer requirements may pass those grandfathered rights on as a package when it sells its customer book to another Marketer.

Tier 1 - Capacity Release

Subject to the conditions described below, the Company will release capacity each month for the 12-month period beginning November 1st of each year equal to the "Tier 1 Maximum Capacity Release Volume." Initially, the Tier 1 Maximum Capacity Release Volume will be set at 75% of the Marketer's estimated November daily load less any Marketer/Direct Customer capacity pursuant to the section above. The Company will release pipeline capacity on the "Selected Pipelines" as specified in the Company's Gas Transportation Operating Procedures Manual in an amount, determined by the Marketer, not to exceed the Tier 1 Maximum Capacity Release Volume for that Marketer. On a monthly basis, the Company will recalculate the equivalent November daily load to reflect any increase or decrease in the number of customers and/or delivery volumes in the Marketer's pool, and adjust the Marketer's capacity release volume accordingly.
