SERVICE CLASSIFICATION NO. 6 - Continued TRANSPORTATION SERVICE

Common Provisions Applicable to Rates I, II, III, and IV - Continued

Terms of Payment

Net cash on presentation of bill, subject to late payment charge in accordance with provisions of General Rule 3.4.10.

Term

Subject to the Availability section of this Service Classification, the term of the agreement for service shall be for a period ending no less than one year from the beginning of service under this Service Classification, and shall continue after the end of such period until terminated by the Customer upon thirty days' prior written notice, or by the Company in accordance with law or the provisions of this Rate Schedule.

Temporary Discontinuance of Service

A Customer who requests a temporary discontinuance of service will be required to pay the monthly contract demand charge and the monthly customer charge for each month that service is discontinued. A Customer whose service is discontinued for non-payment and who applies for service within twelve months at the same location will be regarded as having taken a temporary discontinuance of service and will be required to pay the monthly contract demand charge and the monthly customer charge for each month that service was discontinued and for which the Customer Charge would have been applicable.

Availability

Service will be available under this Service Classification on a pilot program basis, on a first-come first-served basis, until at least September 30, 2002, and will be limited to a total of 100,000 pounds of steam per hour of supply capacity during the months of November through April. Commencement of service under this Service Classification will be limited in each of the 12-month periods commencing October 1, 2000 and October 1, 2001 to no more than three new Customers for their full steam requirements and to no more than two existing Customers under Service Classification Nos. 2 and 3 for increases in their monthly steam requirements. For existing Customers, the increase in steam requirements will be measured on a separate meter, installed by the Company at Customer expense, unless such usage cannot be isolated for separate metering, in which case the increase in the Customer's steam requirements will be established in advance by the Company and the Customer. The Company may seek Commission approval to reduce the hourly volume of steam served under this Service Classification or to otherwise limit this program, at any time, if necessary to maintain system reliability.
