

PSC NO: 15 ELECTRICITY
COMPANY: CENTRAL HUDSON GAS & ELECTRIC CORPORATION
INITIAL EFFECTIVE DATE: 02/05/09

LEAF: 167.2
REVISION: 3
SUPERSEDING REVISION: 2

SERVICE CLASSIFICATION NO. 1 (Cont'd)

RESIDENTIAL SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

1.5 (Cont'd)

Customers shall have the option of using a single meter with bi-directional capability to measure the flow of energy in both directions, or of using two meters to separately meter the flow of energy in each direction. Customers electing to have their generator's output measured through a separate meter shall be responsible for the costs of any new meter box and socket, to the extent required. Customers electing the single meter option are advised that the use of a meter running in reverse may not be as accurate as a standard installation.

Customers owning or operating farm waste electric generation equipment who satisfy all installation and operation requirements will be allowed to combine their purchases from and sales to the Company in a billing period.

In the event that:

- (i) the amount purchased from the Company exceeds the amount sold to the Company (net purchases) in a billing period, the Customer will be billed for the difference at applicable rates specified in this Service Classification.
- (ii) the amount sold to the Company exceeds the amount purchased from the Company (net sales), the difference will be transferred to the following billing period and added to amounts sold by the customer in that period. In that latter period, differences will either be billed at applicable rates as in (i) above, or transferred to the following billing period depending on whether the differences represent net purchases or net sales, respectively.
- (iii) the difference at the end of twelve (12) months from the time the Customer contracted for this service represents net sales to the Company, the Company will pay the customer for this difference at the applicable rate under Service Classification No. 10.

Farm waste customer generators may not offset net metering credits against bills for usage metered at locations other than the net metering delivery point.
