### 2.2. Definitions

The following words and terms when used in this tariff have the following meanings:

- (1) An "access controller" is a party known to the Company to be in control of access to the metering equipment at a customer's premises and to have an active account of its own with the Company.
- (2) An "actual reading" is one obtained by the Company's employee from the meter or from a device which receives a reading transmitted from the meter itself.

- (5) A "backbill" is any bill or any portion of a bill, other than a levelized bill, which represents charges for service that was actually delivered to the customer's premises during a period before the current billing cycle, which was not previously billed.
