

PSC No: 120 - Electricity
New York State Electric & Gas Corporation
Initial Effective Date: March 1, 2006

Leaf No. 117.7
Revision: 0
Superseding Revision:

GENERAL INFORMATION

25. Incremental Load Incentive: (cont'd.)

Electric Supply Pricing Options:

Customers qualifying for an ILI may select one of the following rate options, as specified in General Information Section 12, Customer Advantage Program of this Schedule: (1) ESCO Price Option (EPO), (2) NYSEG Variable Price Option (VPO), or (3) NYSEG Fixed Price Option (FPO).

The qualified ILI customer must choose the same rate option for its incentive load, non-incentive load, and any future ILI load at the facility.

If the customer has not elected a rate option by the time of billing, NYSEG will bill "Large" customers on the VPO rate, and "Small" customers on the applicable FPO rate. ("Large" and "Small" customers are defined in General Information Section 12, Customer Advantage Program, of this Schedule, at subsection C.3., Customers Applying for Service.)

A customer electing FPO or VPO must contact NYSEG to convey its selection. A customer electing the EPO must adhere to the process set forth in Section 12.G.3., Process for Changing to a Retail Access Rate. The Energy Services Company ("ESCO") will contact NYSEG directly to convey the customer's EPO rate option selection and Retail Access enrollment.

Billing:

The Company will calculate bills for service supplied under the ILI in accordance with the applicable Special Provision under Service Classification Nos. 2, 3 and 7.

A qualified customer will have its monthly service bill reduced by the amount stated in the applicable Special Provision for Economic Incentives, in excess of a baseline of KW and /or kWh established for each monthly billing period. For an existing customer, the baseline(s) will be based on a one-year historical period, actual or estimated, as determined by the Corporation prior to qualification for the incentive. For a prospective customer, the baseline(s) will be zero.
