## 7. INTEGRATED SERVICES

### 7.1 Access Advantage Plus<sup>1</sup>

Access Advantage Plus is a dedicated circuit between the Company's network and the Customers Premises. Access Advantage Plus will provide the Customer with a DS1, DS3 or OC3 transport capability from the central office to the CPE.

The circuit provided by Access Advantage Plus service will be used by the Customer as the "host" facility for other connected services offered by either the Company or other service providers. The Customer must maintain a minimum of five (5) Company lines, trunks or Primary Rate Interface B channels (only on DS3 or OC3) that utilize a host Access Advantage Plus facility.

#### 7.1.1 Connecting Services

Services which may utilize the Access Advantage Plus facility as the transport vehicle from the Customer's premises to the Company's network ("Connecting Services") include:

- (A) Local Exchange Access – Local Exchange Access Lines include both single and multi line business local exchange services.
- (B) Trunks – Trunks include PBX trunks.
- (C) Special Access – Special Access Services may include Private Lines as well as connections to Interexchange Carriers.
- (D) Primary Rate Interface ISDN (Only included with DS3 and OC3 Access Advantage Plus).
- (E) Frame Relay Access to Business Networks.

Rates and charges for the Connecting Services are provided in the sections of the Tariff which describe the Connecting Service.

<sup>1</sup> Obsolete – Limited to existing Customers at existing locations.
