Enhanced Alternate Route – Allows incoming voice calls to overflow on an emergency and busy basis to a line or trunk side connection designated by the Customer. A route may be limited in the number of simultaneous calls that can be routed.

Inform 911 – Allows the calling party number of the station to be sent to the E911 database rather than the billed telephone number. It is the Customer's responsibility to provide station number updates to the 911 database.

Measured/Message Rate Usage – Provides for local calling within the Customer's local calling area with usage sensitive charges applied, where available.

Inbound Only – Provides for an inbound calling option on the Primary Rate Interface or Primary Rate Port. No outgoing capability exists when this feature is selected. A minimum of one D Channel is required. It is provisioned using the following:

Inbound Interface – Provides a PRI termination and a digital multichannel transmission path between the central office and the Customer's Premises and is configured with one D Channel or a Backup D Channel and 23 B Channels or 24 B Channels.

Inbound Port - Provides a PRI connection that does not include the facility between the Customer's Premises and the PRI serving office and is configured with one D Channel or Backup D Channel and 23 B Channels or 24 B Channels. The connection is made using a Company-offered transport facility purchased separately and must be at a minimum DS1 level.

Redirected Number – Provides the redirected number (i.e., the directory number to which the call was last presented) to the CPE, as well as the calling number in cases such as call forwarding. If during the call establishment phase, the call is redirected to another directory number by call forwarding, both the calling party number and the redirected number are delivered to the called party. If a call is
