(H) Local Usage Option

1. Customers may select the Unlimited Local Usage option in lieu of paying Measured/Message Rate Usage charges, if available. In areas where there is no Measured/Message Rate Usage offered by the Company, Unlimited Local Usage will be provided.

2. Customers may convert existing ISDN Primary Rate Interface(s) from Measured/Message Rate Usage to the Unlimited Local Usage option, however, the current ISDN Primary Rate Interface TPP contract will be terminated. Termination Charges are not applicable when the Customer converts to a new TPP term having an expiration date which is beyond that of the original. Otherwise, Termination Charges will apply.

3. Customers may convert existing ISDN Primary Rate Interface from the Unlimited Local Usage option to Measured Rate Usage, if available. Customers doing so may elect to retain their original TPP, or sign a new TPP contract. Customers retaining their original TPP will pay Termination Charges on the Unlimited Local Usage option only. Termination Charges are not applicable when the Customer converts to a new TPP term having an expiration date which is beyond that of the original. Otherwise, Termination Charges will apply.

4. The entire ISDN Primary Rate Interface service for the same Customer of record at the same Premises must be uniformly on the same usage rate basis. Combinations of usage rate methods are not permitted.
