

PSC NO: 1 LOCAL EXCHANGE SERVICE
SBC Long Distance, LLC d/b/a SBC Long
Distance, d/b/a AT&T Long Distance
Initial Effective Date: February 9, 2006

Leaf: 159
Revision: 0

Superseding Revision:

In order to be considered an SFM, all associated order activity (disconnects and new connects) must occur simultaneously and the facility to which service is being moved must exist and have sufficient capacity to accept the moved service. *NOTE: AN SFM IS NOT A CUSTOMER INITIATED MOVE OF A CUSTOMER PREMISES AND IS NOT A MOVE OF POINT OF TERMINATION WITHIN THE SAME CUSTOMER PREMISES.* An SFM is a move within the same central office; however, that may result in the change of one end point (e.g., customer premises location) of the circuit involved provided the following conditions are met (1 and 2 or only 3 below):

- (1) The change of Customer Premises can only occur on the end of the circuit which has the Connecting Facility Arrangement (CFA); **and**
- (2) The Customer Premises locations involved in the change belongs to the same customer; **or**
- (3) The Customer Premises locations involved in the change belongs to two different customers, but the customer requesting the SFM has previously coordinated the activity such that all activity (disconnects and new connects) will occur simultaneously. If this coordination has not been accomplished beforehand, then the Company will proceed with the disconnect/new connect orders as non-related and new installation charges will apply for services being relocated.

Private Line SFMs may be performed at the following like-speed and interface service levels; these include:

DS0 to DS0
DS1 to DS1
DS3 to DS3
