#### 9.3.5 Port/Port Modification

##### (A) DS1 Port Modification

A charge applied when an existing port is reconfigured with other ports resulting in removal of the port and substituting other port(s) in its place. There is no 100% discount off nonrecurring charges on ports ordered on a subsequent order. If additional ports are being ordered for an existing circuit, this rate element does not apply.

##### (B) DS3 Port Modification

A charge applied when an existing port is reconfigured with other ports resulting in removal of the port and substituting other port(s) in its place. There is no 100% discount off nonrecurring charges on ports ordered on a subsequent order. If additional ports are being ordered for an existing circuit, this rate element does not apply.

#### 9.4 Moves and Rearrangements

##### 9.4.1 Service Facility Move

A SFM is a customer-initiated move of one end of a Company central office (POP) distribution link (e.g., jumper cable, DSX patch cable, etc.) from one facility to another existing facility (of the same or higher transmission speed). All activity associated with the SFM must occur within a single Company POP. Rates for SFMs are one-time, nonrecurring charges.
