(B) It is used primarily and substantially for social or domestic purposes and the line is located in a residence, or in the case of a combined business and residence Premises, is located in the bonafide residential quarters of such Premises and a separate Business Line is located in the business quarters of the same Premises.

3.8 Charges Based on Duration of Use

Where charges for a Service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

3.8.1 Calls are measured in duration increments consisting of initial period and additional periods.

(A) Initial Period – The initial period is the length of a call for minimum billing purposes. If the duration of the Customer's call does not continue for the entire initial period, the Customer is charged for the entire initial period. The initial period varies by rate schedule and is specified in individual product rate sections of this Tariff.

(B) Additional Period – The additional period is the rate element used to bill chargeable time when a call continues beyond the initial period. The additional period starts when initial period ends. Additional period rates apply to any fraction of the time period for chargeable time beyond the initial period. If the duration of the Customer's call does not continue for the entire additional period, the Customer is charged for the entire additional period. Additional periods vary by rate schedule and are specified in the individual product rates section of this Tariff.
