 SBC Long Distance, LLC d/b/a SBC Long
 Distance, d/b/a AT&T Long Distance
 Initial Effective Date: February 9, 2006

Leaf: 78
 Revision: 0

Superseding Revision:

The airline distance between any two (2) rate centers is determined as follows:

(A) Obtain the “V” (vertical) and “H” (horizontal) coordinates for each Rate Center from the LERG.

(B) Compute the difference between the “V” coordinates of the two (2) Rate centers; and the difference between the two (2) “H” coordinates.

(C) Square each difference obtained in step (B) above.

(D) Add the square of the “V” difference and the square of the “H” difference obtained in step (C) above.

(E) Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

(F) Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

(G) FORMULA

$$\sqrt{\frac{V1-V2)^2 + (H1-H2)^2}{10}}$$
