4.8 Features-Description

Anonymous Call Rejection – prevents calls that are blocked (*67 per call blocking or per line blocked call) from reaching the phone of the user. The phone never rings and the caller hears a message stating that the number dialed will not receive blocked calls.

Auto Redial – calls back the last number called, whether to re-contact a person or because of a busy signal. If the line is busy, Auto Redial will continue to try the number for up to 30 minutes. When the line becomes free, the call will be placed and a special ring will notify the user. Calls can be placed or received while Auto Redial is at work. In addition, more than one number can be re-dialed at a time.

Call Blocker – allows the user to reject calls from up to ten numbers, including the last number called if the user so designates. When a call from the list comes in, the user's phone does not ring while the caller hears a recording indicating the call will not be accepted.

Call Forwarding – directs all incoming calls to any customer designated phone number.

Call Forwarding/Busy Line – Don't Answer (BLDA) – allows incoming calls that encounter a busy condition or are not answered after a customer-designated interval, to be automatically forwarded to another telephone number. The subscriber designates the number(s) when the service is ordered. The Busy Line and the Don't Answer functionality may be ordered as separate features.

Call Forwarding Selective – forwards up to 10 numbers to the number designated by the user.

Call Forwarding Simultaneous - forwards more than two calls that come in at the same time. With all other Call Forwarding services, only two calls can come in at the same time without the caller getting a busy signal. A Simultaneous Call Forwarding user can choose from 3-99 calls being forwarded at one time without receiving a busy signal.
