

PSC NO: 1 LOCAL EXCHANGE SERVICE
SBC Long Distance, LLC d/b/a SBC Long
Distance, d/b/a AT&T Long Distance
Initial Effective Date: February 9, 2006

Leaf: 101
Revision: 0

Superseding Revision:

Hunting-Circular – allows a complete hunt over all the access lines in a prearranged access line hunt group. If no idle access line is encountered the hunting will continue until it reaches the access line that was originally called.

Hunting-Series Completion - hunting for an idle access line starts with the called access line in a prearranged hunt group and ends with the last access line in the hunt group, completing the call to the first idle access line encountered. Unless the first access line in the hunt group is called, only a portion of the access line group is hunted.

International Call Blocking - Blocks the Customer from being able to place an outgoing call from a particular line to an international number.

Message Waiting Indicator - provides both stutter dial tone and a visual indicator that lets the user know there is a message in the voice mailbox. The visual indicator requires type 2.5 or higher CPE.

Priority Call - allows the user to program the phone to recognize calls from specific numbers. A special ring is heard when one of those numbers calls.

Remote Access to Call Forwarding (RACF) - allows the user to control and change Call Forwarding from any touch-tone phone.

SBC Multi-Line for Business – an additional voice grade DTMF communications channel to SBC Phone Solution for Business. It also provides Caller ID Name and Number, Three-Way Calling, and the customer's choice of hunting options (circular or series completion) and local usage.

SBC Multi-Line for Residence – an additional voice grade DTMF communications channel to SBC Phone Solution for Residence and provides local usage.
