

PSC NO: 119 ELECTRICITY
NEW YORK STATE ELECTRIC & GAS CORPORATION
Initial Effective Date: 09/01/03

Leaf: 52
Revision: 0
Superseding Revision:

GENERAL INFORMATION

3. Service Connections: (Cont'd.)

A. Service Entrance Requirements and Meter Ownership: (Cont'd.)

2. Meter Owned by Customer, Installed and Maintained by the Corporation: (Cont'd.)

a. (Cont'd.)

i. Meter Ownership Credit

Customers, as specified in paragraph 2.a above, will receive a monthly Meter Ownership Credit differentiated by Service Classification:

SC 2	SC 7-1	SC 3P	SC 7-2	SC 3S	SC 7-3	SC 7-4
\$2.96	\$3.80	\$3.34	\$5.29	\$3.81	\$6.43	\$6.65

- b. Any customer may request the installation of a Commission-approved meter compatible with the Corporation's metering infrastructure which provides other than the basic billing determinants consistent with the customer's service classification. Such metering, subject to the availability of equipment, will be installed, operated and maintained by the Corporation at the customer's expense.
- c. Only Commission-approved meters compatible with the Corporation's metering infrastructure will be installed. The infrastructure requirements include compatibility with NYSEG's meter reading systems, meter communication systems, billing, testing procedures, maintenance requirements, installation specifications and procedures, and security and safety requirements.
- d. The Corporation will perform any operations, including, but not limited, to programming, installing, reading, disconnecting, reconnecting, sealing, testing, maintenance and removing meters and metering equipment in connection with providing service to the customer.
- e. The customers will provide, at their own expense, any communication service and equipment necessary to remotely communicate with a customer-owned or requested meter or if the Corporation requires remote communications to access the unique meter requirements.

3. Meter Owned, Installed and Maintained by Third Party:

- a. Consistent with the Commission's New York Practices and Procedures for The Provision of Electric Metering In A Competitive Environment, set forth within Addendum-MET of PSC 90 ("Manual"), or superseding issues thereof, Qualified Customers who have a metered demand of at least 50 kW at each meter in any two consecutive months during the most recent twelve (12) month period may select the Competitive Metering Option as set forth in PSC 115 - Electricity, at Section 14 Competitive Metering Option.
