

NY PSC Tariff No. 6 - TELEPHONE
PAETEC Communications, Inc.
Initial Effective Date: 10/9/2003

Section: 4 Leaf: 1
Revision: 0

Section 4 - INTRALATA TOLL USAGE AND MILEAGE CHARGES

4.1 GENERAL

4.1.1 Description

IntraLATA toll service is furnished for communication between telephones in different local calling areas within a particular LATA in accordance with the regulations and schedules of charges specified in this tariff. The toll service charges specified in this section are in payment for all service furnished between the calling and called telephone, except as otherwise provided in this Tariff.

IntraLATA toll calling includes the following types of calls: direct dialed, calling card, collect, 3rd number billed, special toll billing, requests to notify of time and charges, person to person calling and other station to station calls.

A. IntraLATA Pre-Subscription

The following intraLATA Pre-subscription options are available to customers.

The intent of the Plan is to permit customers to route intraLATA toll calls automatically, without the use of access codes, to any interexchange carrier ("AIXC") of the customer's choice that has established itself as an access customer under PaeTec's Access Services Tariffs filed at the FCC and with the Commission.

PaeTec will implement a full 2-PIC carrier selection methodology. With the full 2-PIC methodology, customers will be able to presubscribe to one telecommunications carrier, including PaeTec, for interLATA toll calls and to presubscribe to the same or a different participating telecommunications carrier for intraLATA toll calls.
