

NY PSC Tariff No. 6 - TELEPHONE
PAETEC Communications, Inc.
Initial Effective Date: 10/9/2003

Section: 5 Leaf: 18
Revision: 0

Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

5.8 LOCAL OPERATOR SERVICE (Cont'd)

5.8.1 Description of Services (Cont'd)

G. Three Way Calling

Three-Way Calling permits the customer, by operation of the switchhook, to place an existing call on hold, dial the telephone number of a third party and establish a local or toll three-way conference call. The customer may talk privately with the third party before establishing the three-way connection and may disconnect the third party to re-establish the original connection. The customer's line establishing the conference call must remain open for the duration of the call or the connection for all callers will be terminated. In addition, where facilities permit, Three-Way Calling may be used by a customer who has Call Waiting with Tone Block to deactivate Call Waiting during a call.

H. Speed Calling

Speed Calling is an arrangement which provides for the calling of a telecommunications network number by dialing an abbreviated code. Two arrangements are available, an eight-code capacity and/or a twenty-code capacity.

I. Call Transfer

Call Transfer is an arrangement which allows for the transfer of incoming calls to another line in the same residence or business.

J. Call ID

Call ID and Call ID with Name Service may be provided to residence, business and PBX customers (if the PBX equipment is compatible with Call ID.) This feature allows a customer to see the telephone number of an incoming call displayed on the customer provided display unit. The telephone numbers that will be displayed on a Call ID subscriber's display unit include listed, non-listed and non-published numbers. Telephone numbers that will not be displayed are: (1) calls from customers who use Per-call Blocking or Line-Blocking (2) calls from customers located in central offices not a part of the SS7 Signaling System and; (3) calls placed through an operator.
