

NY PSC Tariff No. 6 - TELEPHONE
PAETEC Communications, Inc.
Initial Effective Date: 10/9/2003

Section: 9 Leaf: 1
Revision: 0

Section 9 - SERVICE AREAS

9.1 General

Each exchange within the Company's service area within New York is assigned to a Zone which is used to specify Business and Residential Local Flat and Local Measured Rates. Sections 11.3 through 11.8 of this tariff illustrate Company New York local calling areas. Section 11.2 defines exchanges by geographic areas and NPA/NXXs.

Zone One indicates contiguous exchanges and is considered local calls. Zone One rates can be found in Addendum A of this tariff. All calls made to locations other than those included in Zone One are considered intraLATA toll calls.

For example, suppose a customer wanted to know how much it would cost to call Amityville from Nassau. First they would need to define Nassau by locating their specific geographic location and NPA/NXX in the definition section 11.2. Then they would refer to the chart in section 11.3 and locate Nassau in the left column under EXCHANGE. Next, they would search for Amityville in that row under the column heading ZONE ONE. Amityville is located under ZONE ONE and thus the call has a Zone One rate. If Amityville was not located under the column heading ZONE ONE it would be considered an intraLATA toll call.

9.2 Definitions
