Superseding Revision: 0

SECTION 2 - GENERAL RULES AND REGULATIONS

M. TELECOMMUNICATIONS SERVICE PRIORITY (Cont'd)

- 2a. TSP Request Process - Restoration (Cont'd) (T)
- b. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
 - c. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>)
 - d. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
 - e. Submit the SF 315 to the OPT.
 - f. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.
- 2b. TSP Request Process - Provisioning
- To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2a. above for restoration priority assignment except for the following differences. The user should:
- a. Certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 2a.a above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
 - b. Verify that the Company cannot meet the service due date without a TSP assignment.
 - c. Obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for telecommunications service, and include the head of director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.
3. Responsibilities of the End-User
- End-Users or entities acting on behalf must perform the following:
- a. Identify telecommunications services requiring priority.
 - b. Request, justify, and revalidate all priority level assignments. Revalidation must be completed every two years, and must be done before expiration of the end-user's TSP Authorization Code(s). (T)
