

PSC No:4 Gas
Corning Natural Gas Corporation
Initial Effective Date: 10/01/2003

Leaf: 80
Revision: 0
Superseding Revision:

24. Following Information Applicable to Transportation of Gas Service Only:

A. Increases in Rates and Charges:

The rates and charges under this Service Classification will be increased pursuant to General Information Rule 12 (K).

In the event that the provision for transportation services to the Customer requires the Company to engage the transportation or storage services of others, an amount reflecting the costs incurred by the Company will be added to this rate.

To the extent that the Customer consumes more gas than it has contracted for in the individual service agreement, the excess gas will be considered to be normal sales and will be billed in a manner consistent with such sales.

B. Quantities, Measurement and Balancing:

The annual quantity of natural gas to be transported under this service classification shall be specified in individual service agreements with each customer hereunder designated as the "Annual Contract Quantity".

The quantity of gas received by the Company during any one month period for the account of the Customer from each of the Customer's Supplier's shall be the quantity metered at the points of receipt specified in the effective Service Agreement hereunder, if such receipts are separately measured.

In the event any such point of receipt is also a point at which the Company buys or exchanges gas through the same meter, then the quantity of gas received for the account of the Customer shall be the quantity scheduled by the Company's dispatchers, the Customer and Customer's Supplier, to be received for the account of the Customer at such point during such one month period, subject to reconciliation to reflect actual deliveries.

The quantity to be billed under this Service is the quantity delivered to the Company less an allowance for losses incurred in the process of delivery as described on Leaf 71.

Balancing: Customers taking service under SC7 will be responsible for balancing the deliveries to the Company with their actual usage on a daily and monthly basis. If on any day the over-delivery or under-delivery is less than 10% of the customer's actual daily usage, the customer may adjust subsequent daily deliveries to the Company by an amount not to exceed 10% of any day's usage to eliminate any over or under-deliveries by the end of the month.
