2. Definitions

Certain terms used generally throughout this tariff are defined below:

Access Code - A sequence of numbers that, when dialed, connect the caller to the provider of services associated with that sequence.

Aggregator - Any person or entity that, in the ordinary course of its operations, makes telephones available to the public or to transient users of its premises, for intrastate telephone calls using a provider of operator services. An Aggregator is also both an Authorized User and a Customer.

Authorization Code - A numerical code, one or more of which may be assigned to a Customer, to enable the Company to identify the origin of the service user so that the Company may rate and bill the call. All Authorization Codes shall be the sole property of the Company and no Customer shall have any property or other right or interest in the use of any particular Authorization Code. Automatic Numbering Identification ("ANI") may be used as or in connection with the Authorization Code.

Authorized User - A person or entity which accesses the Company's services. An Authorized User is responsible for compliance with this tariff.
