SECTION II - SERVICE DESCRIPTIONS *continued*

2.5 SERVICE OPTIONS *continued*

2.5.25 Instantline 800

Instantline 800 is an inward switched access service which permits intrastate and interstate calls to terminate at an Instantline customer's station while originating at stations in different service areas and in which the Instantline customer is billed for the call rather than the call originator.

Charges for Instantline 800 are based on length of call, time of day, and location called.

The customer's total monthly use of the Carrier's Service Instantline 800 is charged at the applicable rates per minute set forth in the Flexible Rate Schedule, which are based on the originating and terminating locations of each call. Calls are billed in six second increments with a thirty second minimum for each call. Any fraction of an increment is rounded up to the next whole increment.

2.5.26 Simple Connect 8xx

Simple Connect 8xx is a shared, inward switched service which permits inbound calls, originated by dialing an 8xx number to terminate at a MultipointK 8xx customer's common line (i.e., business or residential line), provided a valid Personal Identification Routing Number ("PIRN") is entered by the caller. The Simple Connect 8xx customer is billed for the call rather than the call originator. Simple Connect 8xx service completes calls to a Carrier assigned 8xx telephone number. The PIRNs entered by the caller determine the customer's designated telephone number to which the 8xx call will terminate. Upon request, from one to a maximum of ten PIRNs may be assigned by the Carrier to the customer excluding those PIRNs reserved for special use by the Carrier. Requests for four or more PIRNs are subject to credit approval by the Carrier. Simple Connect 8xx service employs shared telephone numbers and, by conversion to Simple Connect 8xx service, the Simple Connect 8xx customer releases any ownership or exclusive rights of its 8xx telephone number to the Carrier.
