SECTION II - SERVICE DESCRIPTIONS *continued*

2.5 SERVICE OPTIONS *continued*

2.5.40 Other Services *continued*

B. Dedicated Flexcall

Dedicated Flexcall is a switched long distance service that requires the customer to access the Company's network via dedicated access facilities. These facilities can be digital or analog. Dedicated Flexcall is targeted to large volume users who can take advantage of dedicated access. Service is offered and can be configured for outbound only, 800 inbound only, or a combination of both.

Features:

Dedicated Flexcall is available with the same features as provided with FLEXCALL in Section II and with 800 Service as defined in preceding paragraph 1 of this Section. Service is billed in six second increments.

C. Special Pricing Arrangements

The Company may provide special pricing and discounts. Special pricing and discounts are on an individual case basis and will be filed as part of this tariff.

D. Prepaid Calling Card

Prepaid Calling Card provides local, domestic or international calling capability from any touch tone phone. Prepaid Calling Card customers purchase the cards in advance based on predetermined denominations. Cards are offered in denominations of \$5.00 to \$100.00

Two types of cards are available, a Disposable card and a Rechargeable card. The Disposable card has a pre-determined value that once used, can not be replenished. Once the value of the card is depleted additional cards may be purchased. The Rechargeable card can be reused and has a value that once used can be replenished via Master Card or Visa. A minimum amount of \$25 applies for each rechargeable purchase.
