SECTION 12 - INTRALATA TOLL MESSAGE TELECOMMUNICATIONS SERVICE

E. WIDE AREA TELEPHONE SERVICE (Continued)

2. Definition (Continued)

b. 800 Service

- (1) 800 Service is the furnishing of facilities for dial type telephone communication to an 800 Service access line, of a type listed in 9. following, from intraLATA local and toll points within New York State in accordance with the regulations and schedules of charges as specified herein, except as provided in (2) following.
- (2) InterLATA dial type telephone communication to an 800 Service access line, of a type listed in 9. following, is furnished by an interexchange carrier. Any interexchange carrier may provide interLATA service subject to the availability and compatibility of the facilities of the Telephone Company and of the interexchange carrier.

Since interLATA calls cannot be prevented from reaching an 800 Service number, the customer subscribing to intraLATA 800 Service must also subscribe to an interLATA 800 Service or similar service provided by an interexchange carrier.

c. 800 NXX Service

800 NXX Service is an interim service through which a WATS access line, of a type listed in 9. following, is furnished for use by an Interexchange Carrier in providing both intraLATA and interLATA incoming dial type telephone communication service at the Interexchange Carrier's WATS-like rates. 800 NXX Service will be withdrawn when 800 Service with ten digit identification capability is offered.

d. Dial type telephone communication as specified in a. and b. above is a call dialed by the subscriber from his outward WATS access line or an incoming call dialed to a subscriber's 800 Service access line, except that if facilities are not available for dial completion, the call may be placed with a common carrier operator. The call may also be placed with a common carrier operator in the same manner if the subscriber for any reason cannot reach a dialed station.

e. A WATS access line is a transmission path from a Telephone Company Central Office to a subscriber's premises and is provided for the purpose of originating outward WATS calls or receiving incoming 800 Service or 800 NXX Service calls. Each such line will be arranged, at the subscriber's option, for either outward WATS or incoming 800 Service or 800 NXX Service, subject to the provisions of E.4. following.
