SECTION 8 - NON-RECURRING SERVICE, RESTORAL AND CONSTRUCTION CHARGES

D. UNDERGROUND EXTENSIONS FOR NEW RESIDENTIAL SUBDIVISIONS (Cont'd.)

2. Definitions of terms Use in Paragraph D

Applicant - the developer, builder or other person, partnership, association, corporation or governmental agency applying for the construction of telephone or electric distribution lines in a subdivision.

Building - a structure enclosed within exterior walls or fire walls, built, erected and framed of component structural parts and designed for permanent residential occupancy.

Multiple-Occupancy Building - a structure, including row houses, enclosed within exterior walls or fire walls, built, erected and framed of component structural parts, and designed to contain four or more individual dwelling units for permanent residential occupancy.

Subdivision - a tract of land divided into lots for the construction of new buildings, or the land on which new multiple-occupancy buildings are to be constructed, the development of either of which has been approved by governmental authorities having jurisdiction over land use.

Underground Telephone Distribution System - a distribution system in which all distribution cable sections and associated service wire runs are placed below ground, either direct buried or in conduit, as specified needs dictate and may include:

Real wall cable placed on connected row house; and

Pedestal terminals necessary to facilitate installation, operation and subsequent maintenance of the underground distribution system.
