

PSC No: 17 - Gas  
Rochester Gas and Electric Corporation  
Initial Effective Date: June 1, 2003

Leaf No. 83  
Revision: 0  
Superseding Revision:

## **GENERAL INFORMATION**

### **PART II - RULES AND REGULATIONS**

#### **9. EXTENSION AND MAINTENANCE OF DISTRIBUTION PROVIDER FACILITIES (Cont'd)**

##### **H. LIMITATIONS OF SERVICE OFFER**

- 1) The Distribution Provider's offer of gas distribution service included in and made pursuant to the provisions of this tariff, and the service classifications to which it relates, are each subject to and modified by the provisions, conditions and limitations from time to time imposed by executive or administrative rules or orders issued from time to time by state or federal officers, commissions, boards or bodies having jurisdiction.
- 2) The Distribution Provider will render service to a Distribution Customer serving a new Retail Customer provided that such a Retail Customer with an annual load of 100,000 Dt or more install dual-fuel capability for individual pieces of equipment having an input rating of at least 25 MMBtu per hour. If feasible alternate fuels are not available, service may be rendered without dual-fuel capability upon receiving approval from the Public Service Commission.
- 3) The Distribution Provider will render additional service to a Distribution Customer serving an existing Retail Customer provided that such a Retail Customer whose total annual load will be 100,000 Dt or more:
  - a) Install dual-fuel capability for new pieces of equipment having an input rating of 25 MMBtu per hour, and
  - b) Maintain dual-fuel capability for existing pieces of equipment having an input rating of 25 MMBtu per hour for which dual-fuel capability was a prerequisite for originally obtaining or continuing gas service.
- 4) Where dual-fuel capability is or was a prerequisite to new, additional or continuing gas service, the supply of the alternate fuel shall be the sole responsibility of the Distribution Customer and its Retail Customer.
