GENERAL INFORMATION

PART II - RULES AND REGULATIONS

9. EXTENSION AND MAINTENANCE OF DISTRIBUTION PROVIDER FACILITIES (Cont'd)

C. PLURALITY OF SERVICES

The Distribution Provider will supply service to the Distribution Customer's Retail Customer's premises through but one service connection and under but one Service Classification, except where the Distribution Provider elects to supply the Retail Customer's premises by more than one service connection.

D. METER

The Distribution Provider will furnish and install the meter to measure the gas used by the Distribution Customer's Retail Customer in accordance with the provisions of the service classification applicable to the service. Such meter may be installed on the Retail Customer's side of the point of supply and shall remain the property of the Distribution Provider. The Retail Customer shall protect the meter and furnish sufficient and proper space for its installation. The Retail Customer shall continually maintain a safe and clear approach to the meter, or if such an approach cannot be maintained, the Distribution Customer shall bear the expense of relocation of the meter, and relocation of the service lateral, or any portion thereof, to a more suitable location to be mutually agreed upon by the Distribution Provider, the Distribution Customer and its Retail customer, such relocation to be performed by the Distribution Provider.

Meters shall be installed outside, whenever feasible, for all new one, two or three family houses. A remote meter reading device shall be installed for all new one, two and three family houses where an outside meter installation is not feasible.

At the request of the Distribution Customer, a remote meter reading device may be installed for an existing inside meter. The Distribution Customer shall pay to the Distribution Provider the cost of the remote meter reading device and its installation.

If a meter or service entrance has been found to be tampered with, or a theft of service has occurred, the Distribution Provider may charge the Distribution Customer its costs and expenses for investigating, repairing and removing the meter and installing it in a secure location.
