Rochester Gas and Electric Corporation  
Initial Effective Date: June 1, 2003

Leaf No. 137  
Revision: 0  
Superseding Revision:

## SCHEDULE B

### GAS BALANCING SERVICE (Cont'd)

#### TYPE OF BALANCING SERVICE (Cont'd)

##### A) Daily Balancing Service (Cont'd)

##### 6. Balancing Charge

The Distribution Customer will be charged a balancing charge for each therm of gas delivered to the service points in its Balance Control Account. The balancing charge will consist of a charge to cover the Distribution Provider's costs for FTNNGSS deliverability, GSS deliverability, GSS capacity, FTNN capacity, and administrative costs. The balancing charge shall be calculated each month as follows:

- a) The FTNNGSS deliverability portion of the balancing charge is calculated by:

$$BC_{FTNNGSS} = (T_{DDAY} * B_{TOL} * R_{FTNNGSS}) / T_{ANNUAL}$$

Where:

$BC_{FTNNGSS}$  = the FTNNGSS portion of the balancing charge.

$T_{DDAY}$  = the design day throughput in DT for all retail customer service points which are being served under Service Classification No. 3 and are included in a Daily Balancing Balance Control Account.

$B_{TOL}$  = the tolerance band for Daily Balancing Service.

$R_{FTNNGSS}$  = the annualized DTI FTNNGSS I reservation charge per DT.

$T_{ANNUAL}$  = the total normalized annual (twelve months rolling average) throughput for all retail customer service points which are being served under Service Classification No. 3 and are included in a Daily Balancing Balance Control Account.

- b) The GSS deliverability portion of the balancing charge is calculated by:

$$BC_{GSSDEL} = (T_{DDAY} * B_{TOL} * R_{GSSDEL}) / T_{ANNUAL}$$

Where:

$BC_{GSSDEL}$  = the GSS deliverability portion of the balancing charge.

$T_{DDAY}$  = the design day throughput in DT for all retail customer service points which are being served under Service Classification No. 3 and are included in a Daily Balancing Balance Control Account.

$B_{TOL}$  = the tolerance band for Daily Balancing Service.

$R_{GSSDEL}$  = the annualized DTI GSS deliverability reservation charge per DT.

$T_{ANNUAL}$  = the total normalized annual (twelve months rolling average) throughput for all retail customer service points which are being served under Service Classification No. 3 and are included in a Daily Balancing Balance Control Account.
