

PSC No: 19 - Electricity  
Rochester Gas and Electric Corporation  
Initial Effective Date: June 1, 2003

Leaf No. 9  
Revision: 0  
Superseding Revision:

## GENERAL INFORMATION

### PART II RULES AND REGULATIONS

#### 1. DEFINITIONS AND ABBREVIATIONS (Cont'd)

**Service Point:** The Service Point shall normally be at the connection point between the Company's Service Line and the Service Entrance; or, if the Service Line is not owned by the Company, the Service Point is the connection point of the Company's Distribution System to the Customer's or Applicant's Service Line. If both the Customer or Applicant and the Company own a portion of the Service Line, the Service Point is the connection between the Company's portion and the Customer's or Applicant's portion.

**Special Meter Read:** A service provided to obtain an actual meter reading on a date that is different than the regularly scheduled meter read date.

**Supplier:** A qualified, non-utility entity, that has been approved by the Company and is responsible for reliably and continuously supplying electric energy in accordance with the terms and conditions of PSC No. 20 - Electric Distribution Service, in order to meet the constantly varying electric demands of Customers who have agreed to purchase that energy and related services from the Supplier.

**Surcharge:** A charge payable by the customer to the Company in addition to the charge for electricity under the applicable service classification.

**System Impact Study:** An engineering study performed for the purpose of evaluating a proposed distributed generation design for conformance with the interconnection requirements and the standards for transmission and distribution planning. This study also assesses the impact of the proposed design on the safety and reliability of the distribution and transmission system. It also will identify necessary system modifications to accommodate the proposed design, or limitations on the operation of the generation facility.

**Tampered Equipment:** Any service related equipment that has been subjected either to unauthorized interference so as to reduce the accuracy or eliminate the measurement of a utility's service, or to unauthorized connection occurring after a utility has physically disconnected service.

**Transmission Line:** A set of overhead and/or underground conductors and associated equipment (poles, switches, breakers, etc.) that are used for the purpose of transporting bulk quantities of power between stations. Power flow can be in either direction.

**Unit:** A distributed generation facility located on the Customer's premises at the time the Company approves such facility for operation in parallel with the Company's system.
