SERVICE CLASSIFICATION NO. 5 (Continued)

RATE CHOICES AVAILABLE TO CUSTOMERS: (CONT'D.)

2. NYSEG Fixed Price with Supply Credit (BRO w/RAC) (Cont'd.)

These daily average market supply values are used in conjunction with the lighting customer's load shape and luminaire usage data to develop a weighted average value of market supply for the customer's specific billing period. The weighted average value of market supply is multiplied by the customer's billed kWh usage for each luminaire to determine the value of market supply to be credited to the customer's bill.

b) Capacity Component: The RAC also includes a component for the value of Unforced Capacity (UCAP), defined as the market-clearing price of capacity in \$/kWh as determined from the NYISO's monthly capacity auction price. The Capacity Component will be revised in accordance with each monthly UCAP auction held by the NYISO. The capacity price will also include UCAP Reserves, and will then be adjusted for UCAP Losses.

c) Additional Component: An additional credit ("Adder") in the amount of \$0.005 per kWh.

NYSEG will provide Delivery and Commodity Service for the two Non-Retail Access choices.

3. NYSEG Fixed Price (BRO)

This Non-Retail Access choice consists of a bundled price which includes components for the following: fixed NYSEG delivery service, a fixed Transition Charge (Non-Bypassable Wires Charge [NBWC]), and a fixed commodity charge for electricity supplied by NYSEG.
