

PSC NO: 15 ELECTRICITY LEAF: 272.13  
COMPANY: CENTRAL HUDSON GAS & ELECTRIC CORPORATION REVISION: 0  
INITIAL EFFECTIVE DATE: 07/01/04 SUPERSEDING REVISION:  
Issued in Compliance with Order in C. 02-E-1108 Dated December 4, 2003

SERVICE CLASSIFICATION NO. 14 (Cont'd)

STANDBY SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

14.6 (Cont'd)

Qualifying existing OSG customers may make a one-time election within ninety (90) days following July 1, 2004 for those existing OSG customers operating OSG as of January 31, 2003, including wholesale generators and designated technology, as described in Special Provision 14.5, and thirty (30) days prior to the operation of the OSG facility for any other existing OSG customer that is not eligible for the designated technology exemption, to decline the phase-in and take service at the full standby rates of this Service Classification instead of the phase-in rates, by providing written notice to the Company.

14.7 PV and Wind Generation Less Than 15 kVa

Non-demand metered customers with on site wind generation with rated capacity of not more than 15 kVa or on site photovoltaic generation with rated capacity of more than 10 kW but not more than 15 kVa, and eligible for credits from NYSERDA, may elect to sell electric energy in excess of the requirements of the customer's connected load provided that they comply with the Standardized Interconnection Requirements set forth in the SIR-Addendum of this rate schedule. This Special Provision will be available to qualifying customers on a first come, first served basis, until the total rated generating capacity of such photovoltaic and wind generation load on Central Hudson's system is equivalent to 0.8 MW, inclusive of the load served under Special Provisions 1.2 and 6.3.

Customers electing to take service under this Special Provision shall be responsible for all interconnection costs charged by Central Hudson, including charges for a dedicated transformer should it be determined to be necessary. Wiring of these facilities shall be arranged so as to permit the flow of current from the customer to the Company and vice versa.
