

NY PSC Tariff No. 7 – TELEPHONE  
PAETEC Communications, Inc.  
Initial Effective Date: 02/22/2004

---

Section : 8 Leaf: 18  
Revision: 0

## SECTION 8 - BILLING AND COLLECTION (Cont'd)

### 8.7 BLOCKING AND SCREENING:

#### 8.7.1 International Direct Dialed Blocking (IDDB)

International Direct Dial Blocking Service (IDDB) is an arrangement that prevents the use of certain line-side exchange services for the completion of international direct dialed calls. This arrangement recognizes and blocks, by routing such calls to a recorded announcement, any attempt to dial international direct dialed sequences of 011+ or 101XXXX 011+.

International Direct Dial Blocking Service is available for use with the following line-side exchange services.

- a. Centrex
- b. Private Branch Exchange Service (PBX)
- c. Public Telephone Service
- d. Business Exchange
- e. Business ISDN

In addition, IDDB will be provided with other line-side exchange services on an unbundled basis to all business customers where technically feasible and economically reasonable.

IDDB will be provided from suitably equipped serving wire centers as specified in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. Tariff F.C.C. No. 4.

#### 8.7.2 Originating Line Number Screening

Origination Line Number Screening (OLNS) Service provides customers with access to the Telephone Company's Line Information Data Base (LIDB) to facilitate the completion of originating calls from working telephone numbers. In response to a properly formatted OLNS query, the Telephone Company will provide the originating screening requirements for call processing and billing that are associated with the originating line.
