

NY PSC Tariff No. 7 – TELEPHONE  
PAETEC Communications, Inc.  
Initial Effective Date: 02/22/2004

---

Section : 2 Leaf: 21  
Revision: 0

## SECTION 2 - RULES AND REGULATIONS (Cont'd)

### 2.11 OBLIGATIONS OF THE CUSTOMER (Cont'd)

#### 2.11.7 Jurisdictional Reports

Where possible, the Company will determine the jurisdiction of both originating and terminating calls from the call detail records generated via the switched network, and bill usage according to such determination. A call that enters the Customer's or Other Network Provider's ("ONP") network in a state different from the state in which the called station is located will be classified as interstate. A call that enters the Customer's or ONP's network at a point within the same state where the called station is located will be classified as intrastate. In these situations, the call is compensated according to the Company's switched access service rates, terms and conditions. A call that enters the Company network at a point within the same local calling area where the called station is located, as defined by the local exchange tariff of the incumbent LEC in whose territory the call completes, will be classified as local and subject to reciprocal compensation as described in Section 7.

In those cases where it is not possible for the Company to determine the jurisdiction of the call from the call detail, the Customer or ONP may provide the Company with a Percent Interstate Use (PIU) in order for the Company to properly jurisdictionalize intrastate from interstate services. The Customer or ONP may also provide a percent local use (PLU) to be applied to intrastate usage in order to separate the local traffic component. The percent, which should be represented as a whole number, is determined by taking the total interstate or local usage and dividing by the total minutes of use. For example, a Customer or ONP may have 100 total minutes for a bill period. In a situation where the Company might not be able to determine the jurisdiction of those minutes, the Customer or ONP would submit its PIU and PLU. If 90 MOUs were interstate, the PIU would be 90% and the customer would be invoiced for 90 MOUs at the interstate rate as tariffed. The remaining 10 MOUs are assumed to be intrastate if the Company cannot determine jurisdiction unless the Customer or ONP submits a PLU. If 9 minutes were local, the PLU would be 90% and the customer would be invoiced for 9 MOUs at the reciprocal compensation rate and the remaining 1 MOU at the intrastate switched access rate. The Customer or ONP may update the jurisdictional percentages reported to the Company on the First of January, First of April, First of July, and First of October. Reports should be
