

NY PSC Tariff No. 7 – TELEPHONE
PAETEC Communications, Inc.
Initial Effective Date: 02/22/2004

Section : 3 Leaf: 3
Revision: 0

SECTION 3 - SWITCHED ACCESS SERVICE (Cont'd)

3.2.2 Transport Service (Cont'd)

Customers who choose Standard Access connect with the Company's office(s) through another LEC's tandem switch. Transport Service rates are made up of a Transport Termination rate which is assessed on a per transmission path per access minute basis, and a Transport Mileage rate assessed on a per mile per access minute basis. The Transport Termination rate provides for the communication frequency transmission path at the Company switching central office and includes the Transport Service portion of central office switching and central office circuit equipment. The Transport Mileage rate applies to transmission facilities provided by the Company between the Company's central office and a remote switching facility. Standard Access calls are also assessed an Interconnection charge per minute to provide for additional handling costs.

For purposes of determining Transport Mileage measurement, distance will be measured from the wire center that normally serves the customer designated premises to the end office switch(es), which may be a Remote Switching Module(s).

Where transmission facilities permit, the individual transmission path between the Customer's designated premises and the first point of switching may at the option of the Customer be provided with the following optional features at no charge:

Supervisory Signaling
Customer Specified Entry Switch Receive Level
Customer Specification of Local Transport Termination

Issued By: Richard E. Ottalagana, Executive Vice President, Fairport, New York
