

PSC No: 120 - Electricity
New York State Electric and Gas Corporation
Initial Effective Date: December 1, 2003

Leaf No. 235
Revision: 0
Superseding Revision:

SERVICE CLASSIFICATION NO. 7 (Continued)

SPECIAL PROVISIONS: (Cont'd)

(d) (4) Economic Development Power: (Cont'd)

Billing Period:

The billing period for customers served under this special provision shall be the calendar month. When a customer's eligibility for EDP expires, that customer shall revert back to the billing period of the applicable service classification.

NYPA Contract Demand:

In any month that NYPA is unable to deliver to the Corporation, any portion or all of the customer's NYPA Contract Demand, the NYPA Contract Demand shall be adjusted based on the amount of reduced deliveries allocated on a prorata basis across all current EDP contract demands. In such cases, an Adjusted NYPA Contract Demand will be utilized in billing calculations as specified below.

Calculation of the Billing Ratio:

A Billing Ratio shall be developed for the purpose of identifying the portion of the customer's actual metered demand and energy which was supplied by the Corporation and that supplied by NYPA. The Billing Ratio shall equal the NYPA Contract Demand, or Adjusted NYPA Contract Demand in any month that NYPA is unable to deliver any portion of the customer's NYPA contract demand, divided by the greater of a) the customer's current month maximum metered demand or b) the NYPA Contract Demand, or Adjusted NYPA Contract Demand as appropriate. This Billing Ratio, or the Adjusted Billing Ratio in those months when the Adjusted NYPA Contract Demand is used, will be used to apportion both demand and energy between NYPA and the Corporation.

Calculation of Billing Demand:

NYPA Billing Demand:

The NYPA generated portion of the customer's metered peak demand shall be calculated as the product of multiplying the Billing Ratio (or Adjusted Billing Ratio) by the current month's metered peak demand (as determined under S.C. No. 7, metered peak demand is the highest average kilowatts used in a fifteen-minute on-peak interval during the month).

The NYPA Billing Demand to be billed at the Economic Development Power rates of this Special Provision shall equal the greater of:

- a) The above determined NYPA portion of metered peak demand; or
- b) 75% of the customer's NYPA Contract Demand.

In no case shall the NYPA Billing Demand exceed 100% of the NYPA Contract Demand, or Adjusted NYPA Contract Demand, as appropriate.
