New York State Electric and Gas Corporation

Revision: 0

Initial Effective Date: December 1, 2003

Superseding Revision:

GENERAL INFORMATION

14. Competitive Metering Option: (Cont'd.)

(e) Sign-up/Enrollment:

The MSP shall provide the Qualified Customer a statement of the MSP's terms and conditions that detail the Qualified Customer's rights, responsibilities, and expected costs ("Disclosure Statement"). A Qualified Customer's sign-up with the MSP shall not be effective until three (3) calendar days after the Qualified Customer's receipt of the Disclosure Statement.

With a minimum notification time of ten (10) calendar days prior to the Qualified Customer's next scheduled meter reading date, the MSP must provide NYSEG with notice, using Electronic Data InterChange ("EDIC") mechanisms, stating that the MSP will provide the Qualified Customer with competitive metering services beginning on a certain date. The MSP shall provide to NYSEG the name of the customer who is financially responsible for the account, service address, mailing address, account number, and meter number of the Qualified Customer to be enrolled. Until EDIC mechanisms are functional NYSEG will accept the above-specified information by E-mail at suppliers@nyseg.com.

(f) Switching To and From Competitive Metering

Consistent with the Manual, the effective date of initial enrollment and switching to and from Competitive Metering will be as follows. When a Qualified Customer initially enrolls in the Competitive Metering Option, makes a change in MSP, or returns to NYSEG for electric metering services, the change will become effective on the Qualified Customer's next meter reading date, unless a Special Meter Reading date is requested as provided for in this Schedule at Section 16.D.11(f). This process will apply to both Voluntary and Involuntary Switches.

The mechanism or medium used for conveying information for enrollments, confirmations, other requests and reports shall be E-mail until EDIC is functional, as agreed to by the parties. Once functional, EDIC will be used to transmit this information.
