

PSC No: 19 - Electricity  
Rochester Gas and Electric Corporation  
Initial Effective Date: December 1, 2003

Leaf No. 44  
Revision: 1  
Superseding Revision: 0

## GENERAL INFORMATION

### **3. EXTENSION AND MAINTENANCE OF COMPANY FACILITIES TO SERVE CUSTOMER** (Cont'd)

#### **C. PERMANENT SERVICE LATERALS** (Cont'd)

All service to an applicant's or customer's premises, location or building shall be rendered through a single service lateral, except:

- (i) When two or more service connections are necessary to provide service at the least expense to the Company or in order to render proper and reliable service without undue interruptions.
- (ii) When an applicant requests or requires the installation of two or more services to a single premise, location or building, the customer shall bear the costs and expenses for the additional services.

If a residential applicant, because of the length of the service line or other conditions, requires that a service line or portion of the service line be installed at a primary voltage or with a transformer located on the applicant's property, the Company shall install and maintain the primary portion of the service line. The applicant shall bear the costs and expenses for the primary portion of the service line, transformer pad installation, and secondary voltage service line less a dollar allowance equivalent to the allowance for residential service lines under Rule 3.B.(1) for underground service or 3.B.(3) for overhead service. For underground service lines, the applicant may provide for any trenching, provided however that the trench must meet the Company's specifications. If there is any delay or rework occasioned by incomplete or inadequate applicant trenching, the Company may charge the customer any costs and expenses incurred as a result.
