2. Monthly Distribution Demand Charge

For a customer who is selling energy to the Company at distribution voltage there shall be a charge for each kW of Contract Demand. If a customer is receiving service under the terms of another Service Classification through the same meter, the Contract Demand charges under this Service Classification shall apply only to the increment of demand in excess of the maximum annual demand billed under such other Service Classification. For a non-demand measured Service Classification such maximum annual demand taken shall be determined at the time that application for this Classification is made. Such determination shall be made on the basis of the applicable class relationship of noncoincident demand to energy consumption, and shall be considered the customer's Contract Demand.

Contract Demand Charge	\$0.68/kW	\$2.35/kW	\$1.61/kW

3. Increase in Rates and Charges

The rates and charges under this Service Classification, including the monthly minimum charge, are increased pursuant to General Information Section 30 to reflect the tax rates applicable within the municipality where the customer takes service.

DETERMINATION OF CONTRACT DEMAND

The Contract Demand initially shall be the kilowatts specified in the Customer's application for service hereunder and shall be automatically increased to the highest average kilowatts measured in a 15-minute interval during the month, but not less than 100 percent of the greatest such measured demand in the preceding eleven (11) months. In no event shall the Contract Demand be less than zero kW.
