Superseding Revision: 0

GENERAL INFORMATION

PART II RULES AND REGULATIONS

1. DEFINITIONS AND ABBREVIATIONS

Adjusted Gas Revenue: The revenue realized from the applicable service classification rates and charges, minus the revenue taxes, the minimum, charge and the cost of gas.

Aggregation: Receiving, validating and summing forecasts for ESCOs.

Amount of Gas Available for Consumption: The amount of gas delivered to the RG&E city gate less system losses.

Applicant: A residential applicant is a person who requests service at a dwelling for his or her own residential use or the residential use by another person. For purposes of the Home Energy Fair Practices Act - HEFPA, a residential applicant is any person who requests service at a premises to be used as his or her residence or the residence of another person on whose behalf the person is requesting service, as defined in 16 NYCRR 11.2(a)(3).

A nonresidential applicant is a person, corporation or other entity requesting service from the company who is not a residential applicant as defined in 16 NYCRR 11.

Arrears: Charges for service for which payment has not been made more than 20 calendar days after payment was due.

Balance Control Account: The account containing all of a Balance Control Owner's service points which are being balanced under the same balancing option.

Balance Control Owner: An ESCO or DC who subscribes to an agreement indicating it is responsible for all charges, both debits and credits, that are assessed as a result of daily imbalances or any other services as set forth in RG&E's tariff.

Balancing: Matching the amount of gas delivered to the Company's system with the actual load on the system to maintain system integrity.

British Thermal Unit: The amount of heat required to raise the temperature of one pound of water one degree Fahrenheit at 60 degrees Fahrenheit.

Business Days: Any Monday through Friday when the Company's business offices are open.

Capacity: The physical capability to store or transport natural gas, usually measured in therms.

Cashout: The process of monetary settlement of gas supply imbalances.

Citygate: The interconnection point between the facilities of an interstate pipeline and the local facilities through which the Company receives deliveries from that pipeline.

Capacity: The physical capability to store or transport natural gas, usually measured in therms.
