Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

5.8 LOCAL OPERATOR SERVICE (Cont'd)

(N)

5.8.1 Description of Services (Cont'd)

M. Direct Trunk Overflow

The Direct Trunk Overflow feature gives the Customer another termination option if all of their DID trunks are busy. This all-trunks-busy condition may be caused either by legitimate heavy incoming traffic or by a trouble condition where the T-1 system is down and the 5ESS senses that trouble as an all-trunks-busy condition. During either busy condition, the incoming call attempts to terminate to the DID group. When the 5ESS sees all trunks busy, it will choose an alternate route for the call to a telephone number that is programmed in the 5ESS only. This telephone number has the Call Forward Remote feature assigned to it and forwards the call to a number chosen by the Customer. Rate for DTO can be found in the rate attachment.
