Initial Effective Date: May 5, 2005

Leaf: 137
Revision: 0

Superseding Revision:

Measured/Message Rate Usage – Provides for local calling within the Customer's local calling area with usage sensitive charges applied, where available.

Inbound Only – Provides for an inbound calling option on the Primary Rate Interface or Primary Rate Port. No outgoing capability exists when this feature is selected. A minimum of one D Channel is required. It is provisioned using the following:

Inbound Interface – Provides a PRI termination and a digital multichannel transmission path between the central office and the Customer's Premises and is configured with one D Channel or a Backup D Channel and 23 B Channels or 24 B Channels.

Inbound Port - Provides a PRI connection that does not include the facility between the Customer's Premises and the PRI serving office and is configured with one D Channel or Backup D Channel and 23 B Channels or 24 B Channels. The connection is made using a Company-offered transport facility purchased separately and must be at a minimum DS1 level.

Redirected Number – Provides the redirected number (i.e., the directory number to which the call was last presented) to the CPE, as well as the calling number in cases such as call forwarding. If during the call establishment phase, the call is redirected to another directory number by call forwarding, both the calling party number and the redirected number are delivered to the called party. If a call is redirected multiple times, only the first and last redirecting numbers are delivered.

Two B-Channel Transfer – Allows for the connection of two calls, the transfer of the calls together and the subsequent release of the parties from the Primary Rate Interface or Port.

Unlimited Local Usage – An optional usage plan which provides for unlimited, flat rate local calling within the Customer's local calling area with no usage sensitive charges applied. Customers who choose
