GENERAL INFORMATION

6. INSTALLATION OF MAINS, SERVICE CONNECTIONS AND FACILITIES AND EXTENSIONS: (CONT'D)

A. Definitions: (Cont'd)

- (2) The term service line means a piping, including associated metering and pressure reducing appurtenances, that transports gas below grade from a main to the first accessible fitting inside the wall of a customer's building when a meter is located within the building; if a meter is located outside the building, the service line will be deemed to terminate at the outside of the building foundation wall.
- (3) The term public right-of-way means the territorial limits of any street, avenue, road or way (other than a limited access thoroughfare) that is for any highway purpose under the jurisdiction of the State of New York or the legislative body of any county, city, town or village and is open to public use.
- (4) The term adjusted gas revenue means the revenue realized from the applicable service classification prices and charges, minus revenue taxes, the minimum charge and the cost of gas.

B. Provision of Gas Service:

(1) Company Obligation to Provide Gas Service:

When an application for gas service is made to the Company by the owner or occupant of a building situated on property abutting on or having access to any public right-of-way in which the governmental authority having jurisdiction will permit the Company to install and maintain facilities, the Company shall render the service requested in accordance with the provisions of this Schedule.

If due to unusual circumstances the actual cost per foot of a particular installation is greater than two (2) times the Company's average cost per foot of new installations for service for the twelve months ended September 30 of the previous year, it may apply to the PSC for relief from so much of this Schedule as it deems necessary in order to provide the service.
