SERVICE CLASSIFICATION NO. 1
PRIVATE AREA LIGHTING

APPLICABLE TO USE OF SERVICE FOR:

Outdoor lighting of areas other than public streets, highways and roadways, for individuals, private organizations and institutional establishments. Available only where suitable Company secondary distribution circuits are, available or are made available as provided herein.

CHARACTER OF SERVICE:

Unmetered service for limited period, dusk-to-dawn illumination, photoelectrically controlled, approximately 4000 hours per year, approximately 60 hertz and at appropriate voltages designated by Company. Company will own, operate and maintain the facilities required. Customer may designate the following types of service:

- A. Standard Overhead Service-shall include all facilities required to supply overhead service to lamps utilizing luminaires offered that are mounted on poles which are a part of Company's general distribution system.
1. When suitable poles are available on Company's existing secondary distribution circuits or low voltage service laterals, no additional charge will be made for attachment to such poles or lamps served under this Service Classification.
 2. When installation of additional poles and/or extension of Company's existing overhead secondary distribution circuits or low voltage service laterals is required, Company will install, own and maintain necessary poles, overhead wires, guys and anchors, but not more than one pole per lamp served hereunder. Customer shall pay monthly charges, in addition to the applicable Lamp and Luminaire Charge as stated in Rate.
