2. DEFINITIONS (Cont'd)

Residential Subdivision is a tract of land divided into five or more lots for the construction of five or more new residential buildings, or the land on which new multiple occupancy buildings are to be constructed, the development of either of which, if required has been approved (or was required to be approved) by governmental authorities having jurisdiction over land use.

Retail Supplier - is an entity other than the Company that is eligible to participate in the Retail Access Pilot Program to supply electricity to eligible retail customers.

Right-of-Way is the right to pass over, occupy or use another's land for placing and maintaining utility facilities.

Service Connection is one service lateral and its associated service entrance.

Service Entrance is that part of the installation from the point of attachment or termination of the service lateral to and including the service equipment on the customer's premises.

Service Lateral is a system of wires or cables, fixtures and sometimes poles, or the equivalent ducts, conduits and cables when placed underground, used to conduct electricity between the line from which the customer is to be served and the point of attachment to the customer's building or meter pole, in the case of overhead construction, or to the termination of the lateral in the customer's building or transformer enclosure in the case of an underground entrance.

Service Line is an electric line used to connect a distribution line to an individual customer's meter or point of attachment; a service line, at the Company's discretion, may be connected to two or more meters at a single premise.

Shared Meter means any utility meter that measures gas or electricity provided to a tenant's dwelling and also measures service to other space outside that dwelling. "Service to other space" includes service to equipment, such as space-conditioning or water heating equipment, operated for the benefit of common areas of the building or other dwelling units.

Supply Line is a part of a distribution line that is installed between an existing distribution system and an underground distribution line within a residential subdivision.

Surcharge is a charge payable by Customer to Company in addition to the charge for service under the applicable service classification.
