SERVICE CLASSIFICATION NO. 13 (Cont'd)

LARGE POWER SUBSTATION AND TRANSMISSION SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

13.7 ENERGY VALUE OPTION PLAN (Cont'd)

Charges for Service Supplied by Central Hudson (Cont'd)

3) Energy Charges

(a) Energy Delivery Service Charge (for all energy delivered by the Company)

For all energy amounts supplied to the customer that do not exceed the customer's usage, a Delivery Service Charge shall be assessed, which represents the applicable Service Classification No. 13 energy charges less the Base Cost of Fuel adjusted for losses as defined in General Information Section 29.

(b) Energy Fuel Cost Charges (for energy supplied by the Company)

- (i) For the customer's pro-rata share of the Company's nuclear and low cost hydro generation, the customer shall be assessed the average cost of such energy as determined in the Company's Fuel Cost Adjustment calculation in effect at the time of billing.

Each calendar month, the nuclear and hydro energy allocation to EVOP customers will be set at 20%. In months where there is a scheduled outage at Nine Mile Point 2 (NMP2), the 20% allocation will be ratcheted down by the percentage of days the unit is out of service. In the event of an unscheduled outage for a period longer than 3 days in a calendar month, the EVOP customer's bill will reflect an adjustment to the 20% allocation.

- (ii) For energy supplied by the Company to the customer (excluding nuclear and low cost hydro generation referred to in (b)(i) above), the customer shall be assessed the Company's own use adjusted average cost of fuel, less nuclear and hydro generation, as determined in the Company's Monthly Statement of Fuel Cost Adjustment in effect at the time of billing, as described in General Information Section 29 with the following modifications:
