### GENERAL INFORMATION

#### 8. INTERRUPTION AND CURTAILMENT:

Except as provided by the Customer's reservation of sales status, the Company may, at its sole discretion, interrupt or curtail deliveries hereunder on two (2) hours' notice. Notice may be given by telephone.

Interruption and curtailment which is due to distribution capacity limitations will follow a "price-based" queue, whereby the customer(s) with the lowest price is interrupted first and the customer(s) with the highest price is interrupted last.

#### 9. BUYBACK:

Service hereunder is subject to the Company's right to purchase from the Customer pipeline capacity and/or gas supply, hereinafter referred to as a Buyback, during periods of curtailment on the Company's upstream pipeline(s).

#### 10. UNAUTHORIZED OVERRUNS:

In the event actual gas deliveries to the Customer exceed the Customers' MDTQ or the amount authorized by the Company on a day when partial or complete interruption of gas delivery is requested by the Company, all such excess deliveries shall be termed "unauthorized overruns." The Customer shall be required to pay the Company for such unauthorized overruns an amount equal to the prices of the sales service classification assigned to the Customer's meter, plus any costs or penalties assessed by the upstream pipeline or supplier, plus \$1.50 per Therm.

#### 11. QUALITY OF CUSTOMER-OWNED GAS:

Gas delivered by or on behalf of the Customer to the Company shall conform to the upstream pipeline's gas quality standards.

#### 12. HEAT CONTENT AND PRESSURE:

Gas delivered to the Customer will be natural gas or a mixture of natural gas and liquefied petroleum gas with minimum Btu content equal to that stated in the Customer's designated sales service classification with pressure at the option of the Company, but not less than two (2) psig.
