SERVICE CLASSIFICATION NO. 2 (CONT'D)
General Service

TERMS OF PAYMENT:

All bills are due when rendered. Full payment must be received on or before the date shown on the bill to avoid a late payment charge of 1.5% as provided in Rule VIII of the NYMPA generic tariff.

PURCHASED POWER ADJUSTMENT:

The charges set forth in this service classification shall be subject to a purchased power adjustment as explained in Rule IX of the NYMPA generic tariff.

DETERMINATION OF DEMAND:

If metered, the demand shall be the highest average kilowatts measured in a 15 minute interval during the billing period, but not less than one (1) kilowatt.

Where a demand meter is not installed, the demand shall be considered to 50% of the total connected load as determined by the name - plate ratings of all devices, installed, and unused convenience outlet being considered to be 100 watts.

SPECIAL PROVISIONS:

- A. Where total load and operating schedule is predetermined as for signs and billboards, the kilowatt hour use may be computed and not measured.
- B. Whenever taking of service is measured at secondary voltage, metered energy will be billed without adjustment, and whenever taking of service is measured at primary voltage, metered energy will be decreased by three (3) percent. Whenever Electric Department does not have to supply and maintain a transformer for such service, there shall be a discount of (\$0.10) ten cents per kilowatt per month of measured demand. If the demand, in this case, is not measured, the metered energy will be further reduced by two (2) percent. These discounts shall be applicable to the energy charge or the minimum charge, whichever applies.
