 RECEIVED: 08/22/02 STATUS: Effective EFFECTIVE: 08/23/02

Service Classification No. 11
Uncompressed Natural Gas Vehicle Transportation Service (continued)
(Rate Code: 802)

Receipt, Transportation and Delivery of Customer-Owned Gas

On each day during the term of service hereunder, the Customer shall deliver or cause to be delivered at the Receipt Point the Average Daily Transportation Quantity, and the Company will deliver to the Customer the Daily Delivery Quantity. The Customer shall provide to the Company by the 15th of every month notice of the Daily Transportation Quantity Scheduled for delivery at the Receipt Point each day of the succeeding month for the Customer's account. The Customer may modify this Schedule by notifying the Company in writing no less than 24 hours before delivery at the Receipt Point. In the event the Customer tenders quantities in excess of the Average Daily Transportation Quantity, the Company may, in its sole discretion, transport such excess volumes if sufficient capacity is available in its system.

Rate: (per meter, per month)

Price per therm to be determined at the sole discretion of the Company. The Effective Rate will be shown on the Statement of Rates and Charges for Natural Gas Vehicle Service Classification Nos. 9, 10 and 11, filed with the Public Service Commission not less than three (3) business days prior to the effective date of the Statement.

First	3 therms or less per month	\$37.74
Excess of 3 therms	per month	Effective Rate

Heating Value Adjustment:

The volume of gas registered by the Customer's meter in 100 Cu. Ft. will be converted to therms as explained in Rule II.3G. The Customer's meter is that owned by the Company and located at the inlet to the refueling station.

Minimum Charge: \$37.74 per meter, per month.

Increase in Rates and Charges:

The rates and charges under this Service Classification are increased by the applicable percentage as explained in Rule III.2 for service supplied within the municipality where the customer is taking service.

Imbalance between Receipts and Deliveries of Customer-Owned Gas

The Customer shall schedule deliveries to the Receipt Point so that, as near as may be possible, the Customer's daily consumption shall equal the Daily Delivery Quantity. Gas supplied hereunder is in addition to and not part of the Company's system requirements. At the end of each month, the Company will determine the net amount of surplus or deficiency in deliveries of gas to the Customer's usual service point above or below the volume of gas transported to the receipt point to the Company's service area adjusted for losses. The Company shall, within existing limitations of its system, provide for a balancing between the Customer's gas requirements and volumes made available during any hour or day. As part of this balancing, the Company shall deliver, within existing limitations of its supply and system, volumes of gas in excess of maximum hourly and daily volumes of gas made available to the Company by the Customer and bill the Customer for these volumes at the Effective Rate for Service Classification No. 9. The Company shall adjust any net surplus delivered by reducing the volumes of gas dispatched to the next succeeding month.
